PROFESSIONAL SUMMARY

Creative and results-driven UI/UX and product designer with a proven track record of transforming complex requirements into intuitive and visually compelling designs. Adept at conducting in-depth UX research and user testing to deliver user-centered solutions that drive engagement and satisfaction. Skilled in crafting high-fidelity prototypes and interactive mockups while collaborating seamlessly with cross-functional teams to ensure design excellence and project success. Passionate about mentoring emerging design talent and continuously refining design strategies to align with evolving user needs and business objectives.

WORK HISTORY

01/2023 - Current

UI/UX designer

OjSolutions - United Kingdom, Salford

- Translated complex project requirements into innovative and user-friendly visual designs, ensuring alignment with business goals and user needs.
- Improved user experience by creating intuitive and aesthetically pleasing web and mobile interfaces, leading to increased user engagement and satisfaction.
- Streamlined design processes and collaborated with cross-functional teams to deliver high-quality products within assigned timeframes.
- Utilized design expertise to create high-fidelity prototypes and interactive mockups that effectively communicated design concepts to both technical and non-technical stakeholders.
- Conducted comprehensive user testing sessions to gather feedback and iteratively refine designs, resulting in enhanced usability and user satisfaction.
- Led design workshops and brainstorming sessions to foster creative solutions and align team members on design objectives and strategies

01/2021 - 01/2023

UI/UX designer

Perxels - Lagos, Lagos

- Conducted extensive UX research, including user interviews and usability tests, to inform design decisions and enhance the overall user experience.
- Developed and implemented design strategies based on user insights and analytics, resulting in more effective and user-centric solutions.
- Mentored and guided design interns, providing feedback and support to help them develop their skills and contribute effectively to project goals.
- Created and maintained design documentation, including style guides and design systems, to ensure consistency and streamline the design process across projects.
- Collaborated with development teams to ensure design feasibility and implemented design changes based on technical constraints and feedback.
- Brainstorm with clients to guide product ideas and thought processes.
